

# Electrical engineering for communication and security.

- > Data Systems Technology
- > Electrical Installations
- > Security Systems

## > completely safe.

Being one of the leading suppliers of innovative systems in the field of electrical engineering, the company Nutz GmbH plans and installs communication systems, electrical installations and substantial security systems all over Europe.

With its branch offices in Berlin, Erfurt and Frankfurt, the company, which was set up in Aschau am Inn in 1978, ensures a nationwide installation and maintenance service. The combination of most different fields of electrical engineering united in one company guarantees a competent and safe realization, even if the project is complicated.

Highly qualified and motivated employees proved to be the recipe for high-quality services and solutions and they facilitate to master the challenges of most different projects and various fields of business. Specific professional education and advanced vocational training of our employees are the basis of both, a constantly high quality standard and an innovative development of our services and our products.

In order to meet the growing market requirements also in future, a quality management system according to DIN ISO 9001 was introduced in 1998.

## > wide range of services.

### Electrical Engineering

- > Building systems engineering
- > Instabus EIB / LON
- > Sat- / antenna systems
- > Lighting engineering
- > Door entry phone systems
- > UPS systems
- > Standby power supply systems
- > Smoke and heat exhaust ventilation systems

### Data Systems Technology

- > Passive network technology  
up to 1200 MHz
- > Multimedia / CATV
- > Active network components
- > Communication systems
- > AV- / media technology
- > Network support

### Security Systems

- > Intrusion and hold-up alarm systems
- > Radio controlled alarm systems
- > Fire and danger alarm systems
- > Escape door systems
- > CCTV systems, video systems
- > Access control systems
- > Time recording systems
- > BOS - inhouse radio supply

### Maintenance & Service

- > Maintenance and repair
- > BGV A2 (VGB 4) tests
- > E-Check inspections
- > Aftersale and maintenance service
- > Trouble-shooting
- > 24h service
- > Reaction time up to 4h

## > competence to give advice.

The extremely wide range of our services facilitates to offer a variety of individual solutions for your project. Our comprehensive know-how in most different fields of electrical engineering is your guarantee for a professional system solution.

In order to achieve the maximum possible customer satisfaction, we start any project with listening to the customer's wishes and purposes carefully and then we evaluate the plans thoroughly. The next step is to work out customized solutions on the basis of up-to-date technologies and a careful cost-benefit analysis.

Our purpose: a lasting and reliable development of solutions which fully meet your individual requirements.

## > appreciation of quality.

The products of our company have always met the highest quality standards. The VdS Schadenverhütung GmbH confirmed this to our company by granting the VdS approval for setting up security systems and other installations.

Also our customers, whose orders we mainly receive on recommendation, are convinced of the quality of our products. This is the reason why customer orientation and customer satisfaction is our uppermost objective.
